

Fall 2017

Welcome to Believe, Achieve, Succeed!

November 30th, 2017

BAS is off to a great start!

The 7th-9th grade after school program is off and running and, even in our limited time together, the students have made great strides. Working on reading and math enrichment, students strengthen the “fundamentals” and then bring all of their skills and interests into play with their very own Genius Hour projects. Ranging from computer programming to scale models of historic buildings and many things in between, BAS students are hard at work on their passion projects and are eagerly anticipating presenting them to the public at our first program open house on thursday, January 31st from 3-5pm here at MJHS.

Important Upcoming Dates:

Thursday, January 31st: Community night and genius hour presentations -- 3-5 pm MJHS.

Parent Volunteers Wanted!

The after school program is seeking volunteers who can come up to the junior high and help our students with their homework and to tutor students who may be struggling in one or more subjects. Parents are welcome to attend to help, especially with our Genius hour projects.

Hours: 2:30- 5:30

Days: Monday – Thursday at MJHS

(BAS does not meet if school isn't in session)

***** Please be sure to sign in at the JH office when you arrive*****

If you're interested, email Aly White at awhite@morganschools.org
